# Introduction

Greetings!

Amid rising demands for a wide variety of applications, the Korean EMS market needs competitive solutions for high-brightness, high-power and high-efficiency LEDs from global companies. Technologies they need widely range from chips to packaging materials.

The country's dynamic manufacturing infrastructure, both at home and abroad, is in need of the latest technologies, and global companies don't lose this opportunities to grab the golden marketability through presentations, demos and media exposure.

Following last year's successful event, SEMICOMM, Korea's semiconductor PR/marketing agency comes out with LED Korea 2009 for you to promote expansion of the market penetration. We are pleased to invite you to sponsoring opportunity to the event scheduled on Sep. 10-11, 2009 at COEX, Seoul, Korea.

You can show your technologies to the future customers attending. Well, enjoy your colorful presentation to the future of Korean business. There will also be a lot of integrated marketing/PR opportunities we offer before, during and even after the event. Looking forward to your support,

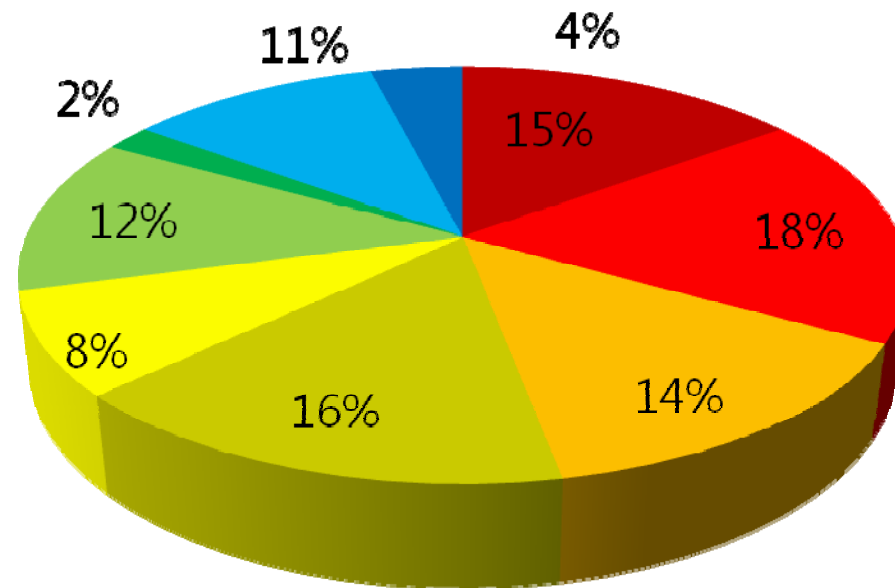

Best regards  
Hordon Kim  
Principal, SEMICOMM
